STA LOCK Cable Kit	5005011A	5005010A

For use with STA-LOK® fittings.

STA-LOK® II is a passive locking feature that automatically locks the handle into place, if it is fully closed. To open the handles there are manual quick release levers. Proper use of this mechanism can help prevent spills by keeping the cam arms from opening under adverse conditions, such as high vibrations, pulsing, wear, and hazardous materials. STA-LOK® II couplers meet the Coast Guard ASTM 1122-87 specifications for Quick Disconnect Couplers.
